

I am a huge fan of XM Radio. I got my XM Radio because of the upcoming traffic and weather channel that is coming to Atlanta. I now hear that the National Association of Broadcasters wants to shut down XM's plans to provide me with traffic and weather here in Atlanta.

I am not in favor of petition 04-160.

I am very happy with my satellite radio and look forward to the traffic and weather channel coming soon to Atlanta. I do not think the FCC should limit my choice.

Respectfully,

Michael Stanton
